

INTERRELATIONSHIP BETWEEN DOMAINS OF DEVELOPMENT

Dr. Marwa Eltanahy

Learning Intention

Explain the interrelationships between these domains of development to have a deeper understanding of the relationship between cognitive, social, emotional, physical, and linguistic development.

Success Criteria

- 1. Relate Learning activities to the developmental domains developed in the classroom.**
- 2. Identify the interrelated domains by analyzing scenarios**

Share your ideas on Padlet

Interrelationship of developmental domain provides a framework to analyze and describe how children change over time in a variety of areas, and the ways delays in development for one domain may have an impact on development in other domains.

How interconnected all these domains are.

Cognitive development refers to thinking and learning.

Emotional development refers to a child's ability to cope with frustration and express their feelings.

Social development is related to how students learn to interact well with others.

Physical development refers to growth in the brain and the body.

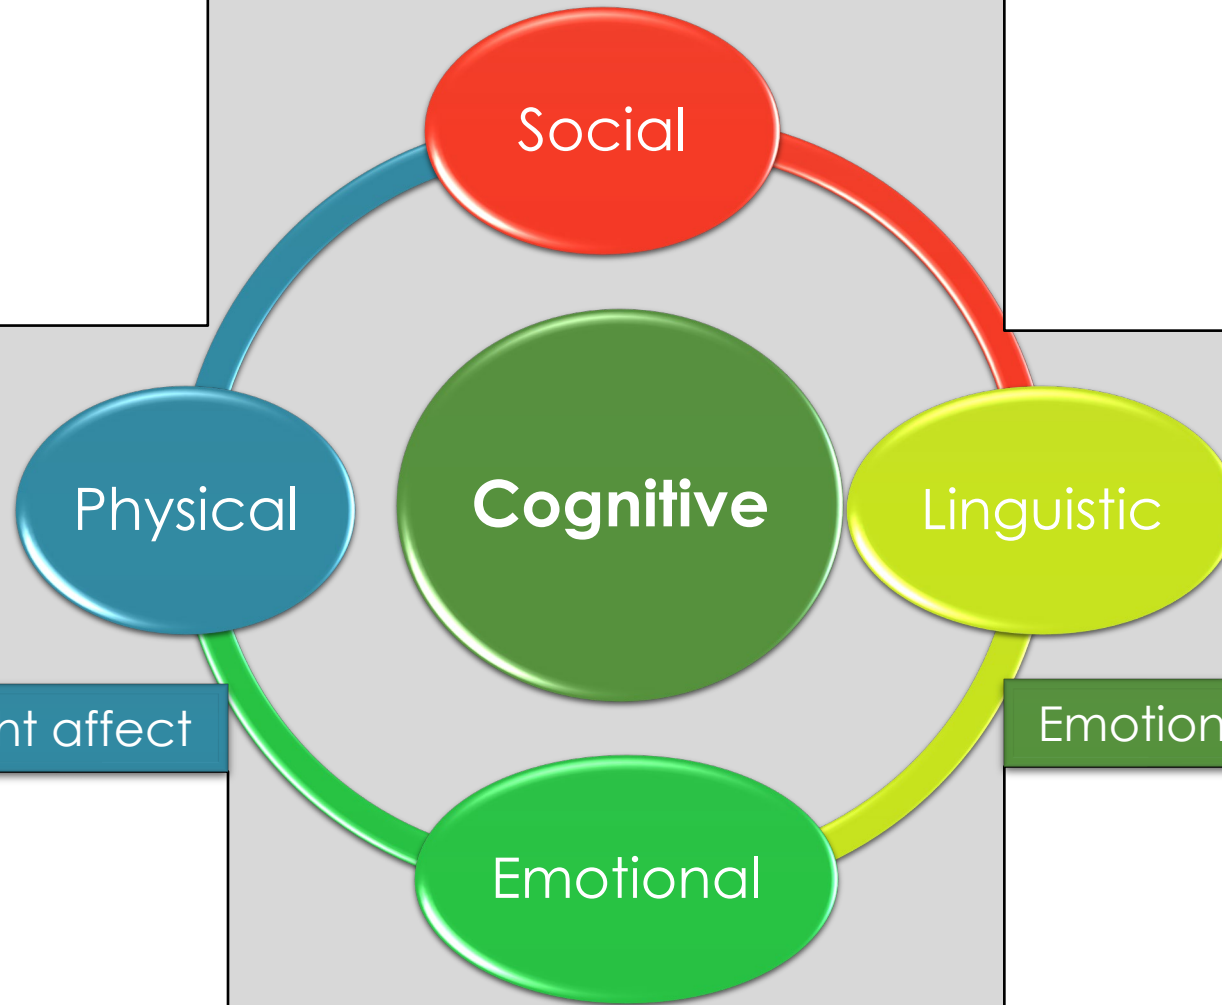

Linguistic development means that a student is able to learn to speak and communicate with others.

All these developmental domains are connected to each other and have different kinds of effects on all the other domains.

Social problems might affect

Watch the Video

Language problems might affect

Physical disabilities might affect

Emotional problems might affect

Analyze this scenario

1. Children who have speech delay, face a difficulty to express their needs to others, so they are extremely shy and might not be able to make friends in school. This is an example of the impact of linguistic development on which of the following developmental domains?

COGNITIVE

LINGUISTIC

EMOTIONAL

PHYSICAL

SOCIAL

Which developmental domains are interrelated?

Evidence from text

Analyze this scenario

3. A child is born with a hearing disability and was delayed in learning to speak. This is an example of the impact of physical development on which of the following developmental domains?

COGNITIVE

LINGUISTIC

EMOTIONAL

PHYSICAL

SOCIAL

Which developmental domains are interrelated?	
Evidence from text	

Analyze this scenario

2. Children who have limited chances to collaborate with other children around, and they have not learned appropriate ways to express what they feel in different situations. This is an example of the impact of social development on which of the following developmental domains?

COGNITIVE

LINGUISTIC

EMOTIONAL

PHYSICAL

SOCIAL

Which developmental domains are interrelated?

Evidence from text

Analyze this scenario

5. A child who feels angry because he is beaten and hurt every time he makes a mistake, and he behaves in the same way with other children who avoid playing with him. This is an example of the impact of emotional development on which of the following developmental domains?

COGNITIVE

LINGUISTIC

EMOTIONAL

PHYSICAL

SOCIAL

Which developmental domains are interrelated?

Evidence from text

Analyze this scenario

4. A student struggles to understand activities conducted in group setting, and has trouble understanding how to interact with children in the team. This is an example of the impact of cognitive development on which of the following developmental domains?

COGNITIVE

LINGUISTIC

EMOTIONAL

PHYSICAL

SOCIAL

Which developmental domains are interrelated?

Evidence from text
